CUSTOMER CARDS SQUARE

RX Card

The RX card is a personal plan you build with your guest during her consult. It shows her two options for today and the products to keep her results at home.

1. Tap **Build A Card**. Type her first name and last initial, like Danielle M.
2. Ask her budget and type it in **Her All In Cost For Today's Visit**.
3. Answer the questions with her: what she is hoping for, her routine and what her hair or skin is going through right now.
4. The card makes two options. **Option 1** fits her budget. **Option 2** is about $60 to $80 more and keeps everything in Option 1.
5. Change anything you like. Tap **Add A Service Or Product** to add more.
6. Save it. She scans the **Client QR Code** on your screen and the card opens on her phone.

Saved Cards keeps every card you made. Search by her name to open one again.

GOOD TO KNOW

Pick your own single process price once ($65, $70, $80 or $100). The card remembers it on

your phone.

Home Care

After her service, send her home with a simple routine. The front desk texts her a Taffeta PDF of it.

1. Type her name and today's service.
2. Search or tap the products you recommend. They show up below with how and when to use them.
3. Change the how-to words for her if you like.
4. Add aftercare notes, a short note from you and when she should come back.
5. Tap **Preview PDF** to see it.
6. Tap **Save & send to desk**. The desk texts it to her and marks it sent.

Her PDF has 5 stars she can tap to leave us a Google review. The stars only work in the PDF that gets texted, not in a screenshot.
